An InServe company

EXCELLENCE

COMPRESSOR TECHNOLOGY

A QUALITY COMPANY

Over two decades of service excellence in the repair & maintenance of leading makes of Screw, Piston & Sliding Vane Compressors makes Goscor Compressed Air Systems the ultimate choice when it comes to choosing a partner in compressor technology.

Proud distributors of Sullair and Ozen compressors and part of the InServe Group, Goscor Compressed Air Systems has the skills, experience and professionalism to attend to all your compressed air needs.

ACCREDITATION

B-BBEE Level 2 Contributor.
Our ISO 9001 accreditation with SABS gives you peace of mind when buying our machines or using our service facilities.

FACILITIES AT YOUR FINGERTIPS

Goscor Compressed Air Systems runs one of the largest compressor test bays. All aspects of the performance can be monitored ensuring that the compressor is in top working order, both mechanically and electrically when leaving the workshop. The test bay is equipped to handle compressors up to 5000 cfm 380V, 525V or 6,6KV.

SULLAIR

An industry leader since 1965, **Sullair** uses its expertise to provide superior compressed air solutions. Also in response to customer needs, Sullair developed a line of proprietary compressor fluids and related products. Sullair has also utilized its rotary screw expertise to produce high efficiency **tandem compressors**, encapsulated compressors, **vacuum systems** and air tools.

ON-SITE SERVICING – 24-7

Goscor Compressed Air Systems boasts of a full fleet of service vehicles to carry out on-site repairs and servicing performed by highly qualified, factory trained technicians. A 24 hour service ensures minimum downtime for your business. Our **24 hour hotline** for breakdown repairs is **074 134 7950 or 082 903 4011**.

It is imperative that all repairs are attended to in the least possible time. Goscor Compressed Air Systems offers a full transport facility, with an offload capacity of up to 15 tons, ensuring that the compressor irrespective of its size, is collected and delivered after the repair or service has been completed.

OZEN

Ozen Compressors long-lasting, high performance air ends and components produced by leading manufacturers of rotary screw compressor components. The perfect lubrication system which is a unique design of Ozen, ensures long air end life and efficient operation.

DESIGNED FOR TOTAL ACCESSIBILITY & RELIABILITY

PRODUCT OFFERING

TYPES OF EQUIPMENT AVAILABLE:

COMPRESSORS	VACUUM PUMPS	DRYERS & FILTRATION	CONSTRUCTION EQUIPMENT	ROTARY SCREW TYPE BOOSTER PUMPS
Oil injected rotary screw (6.8 - 13 bar) Capacity: 0.5 - 82.1 m ³ /min Oil free rotary screw (6.8 - 13 bar) Capacity: 11.9 - 18.8 m ³ /min Portable Diesel (6.9 - 13 bar) Capacity: 5.2r.43.2m ³ /min Compact Oil Injected Rotary Screw(7-13 bar) Capacity:0.32-3.80m ³ /min	Oil injected rotary screw Capacity:2.2 - 71 m ³ /min Vacuum to 29.5" (749.33mm) HG	Refrigerant dryers Capacity:0.4 - 169.8 m ³ /min Desiccant dryers Capacity:0.09 - 283.1 m ³ /min Air filtration / Mist eliminators Capacity:70 - 45.31 m ³ /min	Medium-to-heavy duty Jack hammers (oil free), chipping hammers, (oil free) and rock drills	From 7 bar - 13 bar Outlet Pressure boosted to 40 bar Capacity: 2.1m ³ -10.4m ³

ADDITIONAL OPTIONS

- Financing Options
- Air Rentals
- Maintenance Agreements
- Air and Energy Audits

SERVICES & REPAIRS

ELECTRICAL BACKUP

Goscor Compressed Air Systems offers a comprehensive service including an electrical department, handling all aspects of electrical repairs, again saving the client precious time, and ensuring that all repairs are carried out efficiently and accurately with minimal delay.

No Stone Left Unturned

State-of-the-art equipment and superior quality parts ensure that all work carried out is of a high caliber. A step by step repair program is followed ensuring a quality end product. Before receiving the final touch of spray paint, all repaired compressors are test run for final inspection after which the unit is stamped with a minimum of a one year warranty, depending on the nature of the repair.

ADDED VALUE

Air And Energy Audits

Goscor Compressed Air Systems has the capability of accurately assessing your compressed air needs by conducting professional air audits with the most up to date testing equipment. By ensuring the efficient use of your electrical energy, resulting in potentially massive power savings.

MONITORING

Real Time Monitoring:

We offer Real Time Monitoring using cell phone technology.

By attaching a monitoring device to each compressor we are able to remotely monitor machine running hours as well as other aspects of operation.

The big advantage of this technology is that we are alerted to a potential problem before it occurs, as we are equipped to monitor in real time, this allows us to respond timeously.

Condition Monitoring:

Condition monitoring is carried out when major services are done. An oil sample is taken. The oil samples are sent to laboratory where the integrity of the oil is checked and also checked for microscopic particles. This allows us to see if the oil change intervals can be extended and also if there is any abnormal wear occurring in the compressor. A trend is built up and should any of the oil sample readings begin to deviate from the norm we can investigate and prevent a failure before it occurs preventing unnecessary stoppages and costly failures. Further Vibration Analysis Service can be offered on customer's request.

We offer a number of alternatives to the capital purchase of compressed air equipment.

Other Goscor Solutions:
